CORSERVA®

Asset Recovery Services

Fast, efficient and secure asset recovery for data erasure, resale, disposal, or lease return

Protect Your Data & Gain from Your Legacy Assets

At some point in a company's history, it is not unusual to require asset recovery services and asset disposal services. This can result from system refreshes or redeployments, employee purchase programs, corporate donation, and green initiatives requiring asset decommissioning and OSHA conforming disposal practices. It is necessary to execute asset recovery processes that ensure efficient technology retrieval for data erasure certification, remarketing, environmental disposal, and leased equipment returns.

● **Corserva's Asset Recovery Services Include:**

Data Erasure

Complete sanitization of your data from all storage devices, including laptops, desktops, and servers, ensuring safe disposal

Remarketing

Reconditioning, testing, and resale of legacy equipment to obtain the maximum dollar value

Lease Return

Logistics scheduling and pickup, asset processing, certified data destruction, reporting, and shipment to lessor

Environmental Recycling

Recycling of end-of-life assets using safe and environmentally responsible processes

Corserva offers a variety of plans to completely eradicate data, depending on the needs of your organization and the type of data you have been storing. There are three varieties of our asset recovery services:

Complete Destruction
for the most sensitive data

Maintaining chain of custody, we take a complete inventory of all equipment that is destroyed, provide you with a detailed list of the equipment including serial numbers, and have a separate party certify the complete destruction of the equipment. This entire process is performed at your location.

Secure Data Erasure & Resale
to maximize residual value

We securely erase all data from your laptop and desktop hard drives, as well as your servers. We perform any equipment repairs that are necessary before the equipment can be resold. Then, we remarket the equipment for you. Secure data erasure can be done either on your site, or we can pick up the equipment and process it at one of our locations.

Secure Data Erasure & Lease Return
to ensure lease agreement terms are met

This process is similar to the secure data erasure & resale process above, except the equipment is returned to the leasing agent after all data is securely erased from the equipment. We perform any equipment repairs that are necessary before the equipment can be returned to the lessor, and we replace any necessary equipment.

Corserva takes very seriously the legal requirements and sensitivity of the proper processes of IT asset recovery. With whichever method you choose, your sensitive data is completely and permanently removed from your IT assets. For auditing purposes, you receive certificates to prove that secure erasure has been performed. Our asset recovery services are compliant with state, federal, and international data privacy regulations and guidelines, including ISO 27001 and ISO 27040.
