

# Enterprise Quality WiFi

SOLUTION BRIEF

Your guests expect strong WiFi that is available throughout your property, as soon as they enter your hotel or resort. More so than any other amenity, poor WiFi leads to negative guest feedback and is a common source of guest complaint.

The combination of enterprise quality equipment from HPE Aruba and expert implementation services from Corserva ensures you can provide your guests with a simple and secure wireless experience that reduces frustration and complaints.

## FEATURES

- Enterprise Grade WiFi**  
Let your best-in-class WiFi accurately reflect the reputation of your identity.
- Brand Loyalty**  
Provide an immersive, personalized experience that boosts guest loyalty and increases hotel revenue.
- Signal Strength**  
Mobile devices that connect to your WiFi always get the strongest connection possible.
- Built-in Redundancy**  
Multiple network controllers operate together so that users are not impacted if an equipment failure occurs.
- Support**  
If a problem occurs, just contact Corserva, and we take care of the rest.
- Seamless Upgrades**  
Because reboots are not required during software upgrades, users are not impacted.

## MONITORING & SUPPORT

Corserva has the expertise to manage complicated infrastructure projects of any size. Once we have delivered a strengthened wireless infrastructure for your property, we provide monitoring services to continue to keep your wireless network optimized.

In addition to installing firmware updates when needed and checking for anomalies, we report back to you on the health and utilization of your network, as well as providing end-user support to your staff and guests if issues arise. When we spot potentially troublesome trends on your wireless network, we isolate problems quickly before they impact hotel operations.

## BENEFITS

- ✓ Fast deployment
- ✓ Scalable to grow with you
- ✓ Fully secure
- ✓ Health metrics & reporting
- ✓ Ongoing monitoring of your wireless network
- ✓ Customizable access policies: per user, device, or location
- ✓ Branded landing pages
